Hi Alison,

Thanks for sending another email. I saw it bounced but wasn't able yet to look up the right one. Sorry for my hasty typing and thank you for the follow up. I appreciate you taking the time to look!

Erin

Hello Erin,

I wanted you to know that Jon sent me this e-mail this morning and we are trying to track down the analysis you requested. I'll let you know as soon as I find something!

Also wanted you to have my correct e-mail for the future.

Have a great day! Ali

REsending because I realize that Ali probably never got any of these e-mails because Erin misspelled her e-mail.

Ali -- you might want to send Erin a note (re)introducing yourself and letting ehr know that you got the e-mail (which almost certainly bounced to her). Erin is also involved in the Portal project and a good person to know.

Thanks all,
JR

Hi Tina

How's life?

I'm on the road but saw this e-mail from Erin re: our favorite part of the D-1641 rules. I'm thinking you might know in what documents Ali might look for an analysis of the Roe Island Trigger. Ali is new to the team (though I think you'll remember her from PB Moyle's lab) and both Gary and I are out of town. Can you give us a hint at the type of analysis/document to which Erin might be referring?

Thanks!
Hope you are well.

JR

Hi Allison and Gary,

I spoke with John earlier this week when he responded to a message I sent him about a 2006 TBI analysis (or submittal to the State Water Board) which has information about the Roe Island standard and trigger (part of the 2006 WQCP Delta outflow objective). Bruce Herbold has mentioned this analysis and his recollection is that the information TBI submitted suggested that water has been managed to avoid triggering the Roe Island standard. I've not seen the analysis and can't seem to find it. I've googled away and have found a 1993-ish TBI document (from Gary I think) that describes concern about the Roe Island trigger in comments that were submitted as part of the EPA WQS promulgation that resulted in the X2 standard and the 1995 WQCP update. Those comments are prior to the X2/Delta outflow objective being in place. I don't even know for sure if it is a TBI analysis or set of comments to the State Board. If that document does exist, it would be helpful for me to understand it.

If either of you know of or where this analysis/comment package is and can share it with me, I would be very appreciative. I apologize for the vague description -- please let me know if more information will help you know whether or not it is something TBI worked on and I'll ask Bruce to try and recall more from his memory banks.

Thanks,
Erin
